## PROFILE SUMMARY

---

I am a self-taught MERN Stack Developer with hands-on experience in building scalable and responsive web applications. I have a strong foundation in JavaScript, React.js, Node.js, Express.js, and MongoDB. Although I am early in my development career, I am highly motivated to grow as a developer, improve my technical expertise, and contribute effectively to real-world projects in a collaborative environment.

## SKILLS

---

**Programming Languages:** JavaScript, TypeScript

**Front End Development:** React.js, HTML, CSS, Tailwind CSS

**Back End Development:** Node.js, Express.js, REST APIs, MVC Architecture

**Database:** MongoDB, MySQL

**Tools:** Git, GitHub, Postman, Docker, Figma

**Deployment:** Render, Vercel

**Familiar With:** JWT Authentication, API Integration

## WORK EXPERIENCE

---

**Quality Assurance (QA)** — [SFO Technologies Pvt. Ltd.](#), Kochi — Nov 2021 – May 2024

- Ensured accuracy and reliability of calibration processes in a regulated quality environment.
- Performed calibration of thermal, pressure, electrical, and mechanical equipment.
- Maintained detailed technical documentation and ensured compliance with quality standards.
- Worked closely with cross-functional teams, improving analytical and problem-solving skills.

## PROJECTS

---

### DecibelX — E-commerce Platform

[Live Link](#) — [GitHub](#)

DecibelX is a full-stack e-commerce web application developed for selling audio products. The platform includes user authentication, product browsing, cart functionality, checkout flow, and admin-side product management. The application follows MVC architecture to ensure scalability and maintainability.

- Implemented secure authentication and authorization using JWT.
- Designed RESTful APIs for product, user, and order management.
- Built admin panel features for managing products and orders.

**Technologies:** Node.js, Express.js, MongoDB, EJS, MVC Architecture

### OLX Clone

[GitHub](#)

A React-based classified ads platform where users can post and browse product listings. Firebase is used for authentication and data storage, ensuring secure and reliable access.

- Implemented Firebase Authentication for secure login and signup.
- Developed reusable and responsive UI components.

**Technologies:** React.js, Tailwind CSS, Firebase Authentication

### Netflix Clone

[GitHub](#)

A Netflix-inspired frontend application developed using React.js. The application fetches dynamic movie data from external APIs and focuses on responsive design and component-based architecture.

- Integrated external APIs to fetch and display movie content.

- Implemented authentication using Firebase.

**Technologies:** React.js, Firebase Authentication, External APIs

## EDUCATION

---

<b>MERN Stack Development</b>	2025 – 2026
Prototype	

<b>Diploma in Electronics and Communication Engineering</b>	2021
Kerala Government Certificate Examinations
